Company Profile

About EZER Software Enterprise

EZER Software Enterprise (002167141-K) is a software solution provider whose sole focus is to provide leading solutions to all our clients. We are also involved in customized software development, web development and system integration. EZER Software Enterprise has been established since 2008 with experienced professionals who have vast experiences in various industries.

We are talented professionals who are committed and are fully responsible for what we are doing and delivering. It is our passion and determination to deliver the best solutions to our clients. Throughout our journey, we have handled projects in various scopes and industries. Our well-defined processes enable us to offer quality solutions to our clients and our after sales supports (effectiveness and responsiveness) creates healthy bond with our clients which define "our standards".

Quality, Cost, Time and Support are the four pillars that determine the success of our service. We strive to formulate service strategies to serve our client in a simple way. In the process of offering you the best, we are committed to provide professional, innovation, continuous improvement and value added services.

Our Mission

To design, develop and deliver elegant and affordable solutions that enable client businesses to establish visibility, increase sales, and improve productivity.

To provide on-time service and support that meet customer satisfaction.

Our Belief

At EZERSoft, we strongly believe in delivering exemplary quality standards. Our target is not just to meet the requirements, but to exceed client expectation, both in terms of quality as well as deliverability.

We believe in 3Bs (Better Technology, Better Designs and Better Business Solutions).

Fixed Model

If a project is not complex, has well defined scope and all requirements are clear, than our fixed cost model is best choice. We guarantee on time delivery of the work as per requirements and cost which were predefined.

Hourly Model

For clients whose requirements are not clear and difficult to estimate hour or timeline or for some R&D work, our hourly model is the best to fit. This model provides flexibility in the way client just have to pay for the hours that are invested to perform particular task.

Our Business Models

We work with our flexible business models to provide better service to our clients.

Flexi Model

For clients whose requirements regularly changes and who wants dedicated developers to work on any project our monthly hiring, this model is the best to fit. In this model, there is flexibility for clients to add or remove resources as per their need.
